Award winning Bluewater water purifiers under the spotlight at WQA 2019 Las Vegas Trade Show

Las Vegas, Nevada, April 22, 2019 – [Bluewater](#) water purifiers recently honored with a 2019 Kitchen Innovations Award as well as two Fast Company ‘World Changing Ideas 2019’ accolades will be showcased at the 2019 [WQA Trade Show](#) in Las Vegas, April 24 – 25, on booth 555.

“Our full range of award-winning water purifiers and unique offerings for commercial kitchens and whole-house solutions will include the

stunning [Bluewater Pro 400](#), which won a 2019 Kitchen Innovations award for the way it positively impacts and improves commercial kitchen operations,” said Bluewater US sales chief, Ms. Lin Guo.

She said the Bluewater Pro is a game-changer for both professional kitchens and whole house water purification solutions thanks to its unique, patented technology that generates up to 1825 gallons of direct-flow water a day despite its highly compact, space-saving size.

The WQA Gold Seal certified Bluewater Pro 400, which is innovated and made in Sweden, harnesses patented reverse-osmosis technology called SuperiorOsmosis™. The unique engineering solution ensures the purifier’s membrane is washed continuously while in use to increase filtration efficiency, boost operating capacity, reduces energy use and provide a long service life.

Incredibly compact, the Bluewater Pro measures just 18.3 inches high and 8.9 inches wide. In addition to delivering pristine water quality, the Bluewater Pro provides outstanding green-business credentials such as reducing the need for dishwasher detergents, cutting the need for single-use plastic bottles of water and slashing water wastage common to traditional reverse osmosis systems.

The Bluewater WQA booth (#555) at the Las Vegas Convention Center will also showcase the Bluewater Spirit and Bluewater Cleone models, both also WQA Gold Seal certified.

The Bluewater Spirit delivers up to 936 gallons of purified tap water per day, removing practically all known waterborne contaminants, including chemical substances, toxic metals, and bacteria.

The Bluewater Cleone is the ‘baby’ in the Bluewater line-up, yet delivers customers high-quality clean water from a compact, under the sink unit that enables them to fulfill their demands for a healthier lifestyle, removing 98% of copper, cyst, fluoride, lead and nitrate contaminants from tap water.

“Bluewater water purifiers deliver consumers and small business users one of the best investments they can make in family health and customer and staff wellbeing,” said Ms. Guo.

Editors notes:

National Restaurant Association Kitchen Innovations 2019 Award

Bluewater has been honored with a 2019 [Kitchen Innovations award](#) for its powerhouse [Bluewater Pro 400](#) professional kitchen water purifier. The Kitchen Innovations award recognizes products that ‘meaningfully improve the back of the house’ and ‘positively impact’ commercial kitchen operations.

Fast Company World Changing Ideas 2019

Bluewater was recognized with honorable mentions in two categories – Consumer Products and Developing World Technology. [The Bluewater Global Clean Drinking Water Movement](#) and the [Bluewater Mobile Water Trailer](#) won the recognition of Fast Company editors, writers and outside judges as ideas creative and powerful enough to rank in the list of 2019 World Changing Ideas Awards.
