Bluewater Showcases Groundbreaking Emergency Stations at DIHAD 2025, Dubai, Enhancing Humanitarian Response

Dubai, UAE – 29 April 2025 – Bluewater, a global leader in sustainable water purification and beverage solutions, is showcasing its revolutionary Bluewater Emergency Station at the 21st edition of the **Dubai International Humanitarian Aid & Development (DIHAD)** Exhibition and Conference, taking place from 29 April to 1 May 2025 at the Dubai World Trade Centre.

The Bluewater Emergency Station is designed to deliver high-performance

critical hydration support to crisis-affected communities. These highly resilient systems, which came packed in two large armoured suitcases for speedy deployment in the field, offer a complete solution for water purification, sanitation, and power needs, even in the most challenging environments.

Key features of the Bluewater Emergency Station include:

• **Extremely Portable:** Engineered for rapid deployment, the station

is easy to transport to remote locations, highly durable, and mobile. It has been successfully trialled at military hospitals in Ukraine, demonstrating outstanding reliability under real-world emergency conditions.

- **Up to 99% Purification Efficiency:** Capable of purifying water from heavily polluted sources, the station ensures access to safe, clean drinking water even in the harshest environments.
- **High Water Flow Capacity:** Produces up to **20,000 liters per day**, supporting the immediate needs of large communities or emergency operations.

"The DIHAD Exhibition is the ideal venue for Bluewater to spotlight its Emergency Station, as the show provides a unique opportunity for participants to network, build collaborations, form new partnerships, and showcase the latest technologies and innovative solutions supporting crisis-affected communities," said Nicolas Delgui Kalmert, Bluewater Sales Manager.

Now celebrating its 21st year, DIHAD continues to be a world-leading platform for exchanging humanitarian ideas and practices. Gathering top international professionals and key decision-makers, the conference fosters discussions around best practices in humanitarian assistance and development. It serves as a critical regional hub for innovation, collaboration, and strategic initiatives that enhance the effectiveness of humanitarian efforts worldwide.

Bluewater's participation – together with its Dubai and GCC distribution partner NIA – underscores its commitment to DIHAD 2025's central mission: fostering collaboration among NGOs, UN agencies, charity organizations, governmental bodies, and private sector entities involved in aid and development. In a polarized world, DIHAD remains a beacon of unity and cooperation, dedicated to improving the lives of those impacted by crises and natural disasters.

Attendees can visit Bluewater at Booth E13 to experience firsthand how its hydration Emergency Stations are redefining humanitarian aid through innovation, resilience, and life-saving technology.
