"Bluewater Unveils Innovative Smart Bottling Solution to Combat Single-Use Plastics in Indonesian Hotels"

Bluewater, a pioneer in advanced water purification technologies, has launched an innovative smart bottling solution in Indonesia, marking a significant step in its mission to reduce single-use plastic water bottles in the hotel and restaurant industry. The first of these systems has been installed at the Pullman hotel Central Park in Jakarta.

The compact station not only cleans used bottles, but also fills, labels, and caps them with water that has been purified by Bluewater's smart PRO water purifiers. Capable of supplying up to 17 facilities within a 20-kilometre radius, the system is a testament to Bluewater's commitment to promoting sustainable and responsible water consumption.

Bluewater's smart bottling solution is a game-changer for the hospitality industry, said **[Name]**. By removing up to 99.7 percent of known water contaminants, including toxic chemicals like PFAS, viruses and bacteria, and micro- and nanoplastic particles, we are not only providing clean and healthy drinking water but also making a significant contribution to reducing plastic waste.

Bluewater's initiative aligns with its broader objectives of improving global access to clean drinking water and creating a positive impact on human health and the environment. The company is dedicated to developing and deploying innovative water purification systems that meet the needs of the 21st century.

The launch of the smart bottling solution in Indonesia represents a major

milestone in Bluewater's mission. It is a clear demonstration of how technology can be harnessed to promote sustainability and health in an industry that has traditionally been a significant contributor to plastic waste.

About Bluewater and FloWater

Stockholm-based Bluewater and Denver, Colorado-based FloWater merged in early 2022, and share a mission of innovating solutions for eliminating single-use plastic water bottles and providing access to safe, purified and great-tasting drinking water for everyone. With their beverages, advanced water purification tech, water refill stations and sustainable bottle solutions, Bluewater and FloWater provide water free of heavy metals, 'forever chemicals' (PFAS), bacteria or viruses, microplastics and other contaminants to consumers, business, schools and large-scale sports events globally. Both Bluewater and FloWater have been honored with *Fast Company* "World Changing Ideas" awards, and featured in numerous leading media, including CNN, Forbes, Inc., The Hollywood Reporter, The Financial Times, and The Daily Telegraph.
